Chol Hamoed Pesach 5770

ב' חוה"מ פסח י"ח ניסן תש"ע

This is to clarify that the plant used to manufacture Glicks Potato Chips for Passover is exclusively used for the production of potato chips year-round. On rare occasions the plant packages pretzels. We have thoroughly investigated and implemented the procedures employed at the plant and are satisfied that the entire manufacturing process of Glicks Potato Chips for Pesach are followed and is consistent with the highest standards of kashrus למהדרין מן המהדרין

The Glicks Pesach production at the plant was supervised by a Mashgiach Tmudi who is intimately familiar with all aspects of the plant. He is a recognized expert in kashrus and a Yareh Shמים with impeccable integrity. There was no packaging of the pretzels for more than a week prior to the Pesach production. The entire packing line was properly dismantled and thoroughly cleaned in preparation for the special Pesach run; it was physically and visually inspected by the Mashgiach before the run.

We therefore confirm that Glick's Potato Chips are kosher lemehadrin for Pesach and can be consumed by the public without any concern.
