# VAAD PESACH UPDATE 2010

There are many ingredients and components in medications, which ingredients are freely available. Based on the information we received from manufacturers, as well as from other Kashrus organizations we are pleased to provide you with a list of what may be used. During Pesach, it is preferable to use non-chewable tablets, rather than liquids and chewable tablets.

Most cough syrups and liquid preparations are not certified Kosher for all year round use because they contain glycerine. The following list indicates those items which are acceptable over the Pesach period.
