The only one we are aware of that uses bread crumbs (A&B) uses Yoshon bread.

4.7 Spelt baked products

USA SPELT PRODUCTS NOT CHODOSH
There should be no Chodosh problem at all with spelt products produced in the USA based on the following facts:

1. The spelt grown in the USA is always a winter crop and is Yoshon.
2. About 80% of the spelt grown in Canada is a winter crop, only about 20% is a spring crop that may be Chodosh. Most of the spelt in Canada is grown in Ontario, which is on the eastern part of Canada. This spelt is almost 100% winter crop. The climate in Ontario can support either winter or spring crops. However the winter crops usually yield a much bigger harvest. So Ontario will only produce a spring spelt under the rare occurrence of a failure of the winter crop. Factories that use spelt that are in the eastern half of the USA would most likely use either USA grown spelt or the spelt that comes from the nearby Canadian region of Ontario. In either case, this would be a winter

crop. The 20% spring spelt is grown in Western Canada.

Therefore, our conclusion that the spelt used in products made in the USA can be assumed to be free from Chodosh problems is based on the following. As always, for halacha, check with your own Rav or Posek.

1. It is quite likely that spelt products made in the USA should use locally grown spelt that is Yoshon.
2. Even if they use Canadian spelt, 80% of that is a winter crop and is Yoshon.
3. In the eastern part of the USA, it is probable that much more than 80% of the imported Canadian spelt should be Yoshon. This is because Ontario which is in the east part of Canada basically produces only winter spelt. The spring spelt is produced in Western Canada almost exclusively.
4. Even if the Canadian spelt should be a spring crop, it may be last years and would be Yoshon.

We would like to thank Rabbi Norman of the COR in Toronto and Rabbi Jaffee of the kashrus organization in Montreal who pointed out that our assumptions about Canadian spelt being mostly Chodosh may not be correct. We were able to confirm their information independently from industry and university sources.

7.1 Barley

Pearled barley of the type used in Cholent and soups, enters the market soon after the harvest, unlike malt or malted barley discussed in Section 10.1, for which there is a delay. Caution is urged in storing barley, since it can easily become full of bugs.

BUGS WARNING (not Yoshon problem): Barley should always be checked for bugs. Note that this is not a Yoshon-generated problem, it can occur any time, the whole year.

7.3 Soy, teriyaki and other sauces

IMPORTANT INFORMATION REGARDING SOY, TERRIAKI AND TAMARI SAUCES

Summary: It would seem that soy, terriaki and tamari sauces that have wheat in the ingredients may be Chodosh. In fact, these are surely Yoshon at least up to the packing date of Dec 29 (5 months after July 29, the Chodosh date for wheat) and may be free of Chodosh problems completely. Even if one wants to be machmir on the Dec 29 packing date, whatever you find on the grocery shelves until at least mid February should still probably be all Yoshon.

Details: After being alerted by some mashgichim, we discussed the method of production of these sauces with expert chemists who actually produce them. Here is what we learned:

- All these sauces that contain wheat are fermented over a period of time that is 5 months or longer. All sauces that are produced in a shorter time do not contain any wheat.
- The flour when used may be from spring wheat that may be Chodosh.
- In the production of the fermented soy sauce, wheat flour and some spores are added at the same time to start the fermentation. The spores produce the fermentation, the wheat flour is added only to allow the spores to be more evenly distributed in the liquid and to do a better job. The wheat flour, which at the start is about 7% of the starting volume, is almost completely consumed during the fermentation.
- Terriaki sauce is produced the same way, except they start with only about 3.5% wheat.
- Tamari sauce uses much less wheat.

From a halachic point of view, this production method seems identical to the question we raised many years ago regarding plain white household vinegar. The vinegar is produced from non-Chodosh alcohol. There, some barley malt plus other chemicals are used in combination to cause the alcohol to ferment into vinegar. In the process, the malt is virtually eliminated (much

less than 1/60.). There we consulted several poskim who all ruled that the barley malt is botul. Based on that we believe that in the case of these sauces, as well, the wheat flour may be botul. Please consult your own posek regarding the question of bitul. However, since it takes at least 5 months to complete the fermentation of these sauces, there can not be any Chodosh problem before Dec 29 '16 in any case.

7 Wan Ja Shan Soy Sauce has a Chodosh code of 29/JUL/19, 3 years after packing. yyy

7.4 Vinegar and vinegar-based condiments

Ordinary household vinegar, also known as manufacturers' white vinegar, does not contain any Chodosh-related ingredients. Therefore, most vinegar-based items such as ordinary household vinegar, and condiments such as ketchup, mayonnaise, mustard, pickles, are not Chodosh. However, there are specialty vinegars such as malt vinegar, tarragon vinegar and salad vinegar which are made with high concentrations of malt. These may be Chodosh.

8. Cereals and other grain products

This section contains the following subsections: 8.1 Breakfast cereals; 8.2 Spelt, 8.3 Bulgur, cracked wheat, kamut and cous cous.

8.1 Breakfast cereals

Note: We only investigated the Yoshon status of the cereals. Some cereals may not be kosher. Always look for a kashrus hashgocho on the package before using.

Note: Gluten free oats are regular oats that are grown free of contamination from wheat. As such it could be Chodosh if packed starting July 20 (See Section 2.3.)

WHEAT STARCH: Wheat starch is used in many cereals, some cookies and other products.

In the past we assumed that wheat starch can be made from spring wheat as well as winter wheat. Therefore, we advised that one should be machmir and assume that starting with a packing date shortly after the start of the spring wheat harvest, all wheat starch may be Chodosh. This is still advisable lechatchila when possible. Since wheat starch is used in so many products and in so many ways, that it is often not possible to be certain that the wheat starch is vadai Yoshon. When such certainty is not possible, we were advised that it is permitted to be maikil and assume that that all wheat starch is Yoshon. This assumption is based on the following arguments: (1) There is no advantage in making wheat starch from spring wheat over winter wheat. (2) About 70% of all wheat grown in the USA is winter wheat. This makes winter wheat certainly the rov of all wheat available. (However, this winter wheat can not be used by bakeries for breads, challahs and many other products. Those need spring wheat flour.) It also makes winter wheat cheaper. (3) We apply the sfek sfeika of the Rema since the wheat starch could be from last year. Even if it were freshly manufactured, it is more likely to come from winter wheat which is Yoshon. We consulted the following Rabbonim Shlita who agreed that since it is not possible to clarify the matter beyond what is written above, that it is justified to be makil on wheat starch. (Names in alphabetical order) Harav Hagoan Yisroel Belsky Shlita, Harav Hagoan Moshe Heinemann Shlita, Harav Hagoan Shmuel Kaminezky Shlita and Harav Hagoan Shlomo Miller. This will be the policy of the Guide. For those who wish to be machmir, the chumra packing date for wheat starch would be July 29. As always, consult your own Rav or posek.

9.5 Beverages

This section contains 9.5.1 Beer; 9.5.2 Other alcoholic beverages; 9.5.3 Non-alcoholic beverages.

9.5.1 Beer

For beer made from barley malt, if the dating code is known, it may be Chodosh if packed on Nov 15 or later, as mentioned in the malt discussion of the Preface above. If the code is not given in the Guide you should try to call the company to find out what is the dating code for Nov. 15. If the dating code is not known, then beer purchased after Dec 15 should be assumed to be Chodosh. (As stated above we recommend that for items containing malt it can be assumed that the malt in packages on the store shelves is Yoshon up to a purchase date of March. 15. However, since some beers have a manufacturer's recommended shelf life of only 4 months, we have revised the purchase cutoff date for beers to Dec. 15, unless dating codes are known and it can be determined that the beer was packed before Dec 15.)

10. Food ingredients

This section contains: 10.1 Malt, barley malt; 10.2 Vital wheat gluten. 10.3 Food starch, wheat starch, other ingredients

10.1 Malt, barley malt

OVERVIEW OF THE MALT PROBLEM

Malt and barley malt are used interchangeably among the list of ingredients of packaged foods. Unless specified otherwise, whenever a list of ingredients mentions “malt” it is malt produced from barley. Based on many years of experience, we will use Dec 15 as the Chodosh packing date for malt, unless indicated otherwise. Where the package code is not known, we estimate that for all products using malt if they are purchased before March 15, the malt will probably still be Yoshon. An exception is beer, see below.

The following applications of malt pose a problem of Chodosh. Malt is used for several purposes. Check with your Rav or posek on whether foods using malt for flavoring or coloring may or may not be used if they are made from Chodosh barley. Such malt may be Chodosh if purchased after March 15. Applications of malt for flavoring or coloring include cereals flavored with malt such as Corn Flakes and Rice Crispies. Beer is also included in the category of items which are Chodosh because of malt. (Vinegar was discussed above in Section 7.4.)

We have received *psak halochos* many years ago from Harav Hagoan Yaakov Kaminecky ZT”L and others that baking flour that lists barley malt

in the ingredients does not pose a Chodosh problem, because in this application only, the malt is *botul*. (We have included dating codes for some baking flour for those who do not want to rely on this *psak* that this malt may be used. Call the Hot Line for details of this *psak*.)

To summarize: malt produced after Dec 15 may be Chodosh. Some poskim allow such malt to be used in baking flour. Many poskim do not allow such Chodosh malt when used for flavoring and coloring, such as in cereals, cookies and pretzels. Consult your own posek for guidance. This Guide will note when such malt may become Chodosh, and provide dating codes if applicable and available.

⚭ **Pretzels** The Guide has warned that pretzels contain malt that may be Chodosh. In fact, not all pretzels contain malt. If the ingredients do not list malt, then it can be assumed that the pretzels are Yoshon, if they do not contain whole wheat flour or oats. This is since the usual wheat flour used in crunchy (not soft chewy) pretzels is from winter wheat. If they do contain malt, then they may still be purchased until the purchase date of March 15.

⚭ **Beer:** Beer is usually made from barley malt. If the dating code is known, it may be Chodosh if packed on Nov 15 or later, as mentioned above. If the code is not given in the Guide you should try to call the company to find out what is the dating code for Nov 15. If the dating code is not known, then beer purchased after Dec 15 should be assumed to be Chodosh. (As stated above we normally recommend that for items containing malt it can be assumed that the malt in packages on the store shelves is Yoshon up to a purchase date of March 15. However, since some beers have a manufacturer's recommended shelf life of only 4 months, we are revising the purchase cutoff date for beers to Dec. 15, unless dating codes are known and it can be determined that the beer was packed before Nov 15.)

10.3 Food starch, wheat starch, other ingredients

Adulized yeast no known Chodosh problems

Brewer's yeast It is questionable whether this poses a Chodosh problem or not. Brewer's yeast is listed as an ingredient in some foods such as some potato chips.

Food starch is usually made from corn and is not Chodosh according to the O-U

Maltodextrin when used as an ingredient in foods produced in the USA does not have any Chodosh problems according to the O-U. However when used in foods produced in Europe, it may be made from wheat which could be Chodosh. It is not clear whether wheat must be listed in the ingredients in that case.

Modified food starch is usually made from corn and is not Chodosh according to the O-U

Torula yeast no known Chodosh problems. yyy

11. Professional bakery flour and other bakery ingredients

Yoshon flour used by Yoshon bakeries, pizza shops and such for bread, chalahs, rolls, coffee cake, pizza, etc. has been available one of three ways:

1. Yoshon wheat has been stored in separate silos, along the silos of Chodosh wheat. The Yoshon wheat has been sealed by the O-U and is only opened and ground into flour under the supervision of the O-U mashgiach. This Yoshon wheat would be milled each week and was shipped directly to the distributors and bakeries without the need to store flour before shipment. Therefore this Yoshon flour has the same freedom from worms that the freshly ground flour has all year around. (This freshly ground flour has been only available in large 50 and 100 pound bags sold to bakeries. It was not sold to consumers.)
2. Flour made from winter wheat, which is always Yoshon and is freshly ground. Since such flour does not have a high enough protein level, the protein is increased by adding winter-wheat derived vital wheat gluten or some stored, Yoshon spring wheat. This year,

once more, a version of this type of Yoshon flour is being produced under the hashgocho of the Kof-K.

3. The third approach is the one that was most often used in the past years and is still being used. The flour is produced at the end of the summer before the Chodosh wheat enters the mill. It is then stored and used on an ongoing basis until Pesach. If this flour is stored in cold storage then the problem of worms developing in the flour is virtually zero.

⌘ **General Mills Flour:** see Duso Co. above yyy

WARNING: Dough Conditioners are used by many bakers to improve the quality of their breads, rolls and challehs. These bakers are trying to produce Yoshon, using Yoshon flour.

However, some have not realized that dough conditioners are usually Chodosh.

7Puratos Bagel Improver is a dough conditioner that is used by several bagel shops. Even though the company may claim that it is made from winter wheat, the Kof-K that provides the hashgocho for this product will not certify that claim. Therefore, as of a packaging date of July 29, this item may be Chodosh. The code for July 29 is 03297#### (03=month, 29=day, 7=year, #### not important.) This date is 8 months after packing. Yoshon stored supplies of this item are available from Velenti Co. 718-565-1300 speak to Bob Cory. Please check with your local bagel shops. Many may not be aware of the fact that this or other dough conditioners may be Chodosh! yyy

ESTABLISHMENTS AND SERVICES

DISCLAIMER: The Guide to Chodosh does not give hashgochos for kashrus or Yoshon. The listing of any facility in this Guide does not mean that we investigated its kashrus. For kashrus and Yoshon assurance, look for the certification by responsible kashrus organizations or individual mashgichim.

WARNING: One time it was found that a bagel bakery was making regular bagels from Yoshon flour and whole wheat bagels from Chodosh flour. Bagels have to be cooked before baking. It was found that the Yoshon bagels were being cooked in the same utensils that were being used each day to cook the Chodosh whole wheat bagels. The problems at this bakery were corrected, under the guidance of the responsible hashgocho organization. However, there is no guarantee that such problems were unique to this bakery alone. Mashgichim and consumers who deal with bagel bakeries making both Yoshon and Chodosh bagels must make sure that the same boiler is not used for both.

SPICY FRIES WARNING: Many restaurants, pizza shops and similar establishments offer fried

foods. The menu of fried foods includes fried potatoes. Many of the “spicy fries” and some of the regular french-fried potatoes contain flour that may be Chodosh. The same oil is used to fry other items including falafel balls. Ask you posek or Rav whether those careful about Yoshon are allowed to eat these other fried foods that are inherently not Chodosh, but are fried in the same oil as the fries that contain possibly Chodosh flour. It should be noted that many such establishments have double fryers. This means that the pot of oil may have two baskets immersed in it at the same time. So therefore, it is possible that the questionable fried potatoes and the other non-Chodosh item share the same oil at the same time. Unless certified otherwise, all fried items have this suspicion. We thank Kehilah Kashrus for originally pointing out this problem.

WARNING: Some tuna fish and tuna fish salads used in restaurants contain bread crumbs or flour. Care must be taken to make sure that such ingredients are Yoshon.

14. Israel

14.1 Food exported by Israel

Food produced in Israel under hashgochos considered reliable for kashrus are also always Yoshon. In addition all items produced under the hashgocho of the Badatz of Yerushalayim are also always Yoshon, even if they are packed outside of Israel.

14.2 Food imported to Israel

Many of the American-brand-name food items that are sold in Israel and other countries are produced under contract outside of the USA. The information printed in this Guide should not be assumed to apply to any food items purchased outside of the USA, unless you have a clear indication that that item was indeed produced in the USA. This Guide cannot vouch for the relevance of information printed in the Guide for such items produced in other countries.

▣ **General Mills**. According to the O-U, all wheat used in General Mills cereals is always

Yoshon, with the possible exception of wheat GERM. Wheat germ could be Chodosh stating with a packing date of July 29. Wheat starch is not a problem of Chodosh (see preface.) Barley (but not barley malt) may be Chodosh stating with a packing date of Aug 9. Oats may be Chodosh starting with a packing date of **August 31**. This date has been verified by the O-U. **Therefore**, all cereals, including Cheerios that contain wheat germ in the ingredients have a Chodosh date on the package of Aug 5 '17 (372 days after packing). Those containing barley, such as Multigrain Cheerios, the Chodosh date for the barley is also Aug 16 '17. All cereals that contain oats but no wheat germ or barley, the Chodosh date is Sept 7, 17. If the only questionable ingredient is malt, then the Chodosh code is Dec 22 2017. Fiber 1 Original only is Yoshon. (Note: These products are not formally under the hashgocho of the O-U for Yoshon.). yyy

⌘ **General Mills/Nestle cereals sold in Israel**. Cereals under the hashgocho of the Manchester Beis Din are Yoshon, Cereals manufactured in America have the same Chodosh code as given above for General Mills cereals. **However this is only true if the box states General Mills, Minneapolis, MN and also has an O-U kashrus symbol.** Cereals made in Poland are NOT recommended.

Quaker cereals sold in Israel have the same codes and dates as the listing for the same items sold in the USA, as stated in Section 8.1 of this Guide. Quaker oats cereals made in England and sold in Israel and elsewhere in the world are Yoshon, under the hashgocho of the London Federation of Synagogues, if there is a KF symbol on the package. (Note: Some people in Israel use the term "Quaker" to refer to all hot oats cereals that need to be cooked, regardless of the company which manufactures it. In this Guide, the term Quaker is used to refer only to products made by the Quaker Company, including cereals eaten with cold milk.)

Rabbi O. Y. Westheim. Everything under his hashgocho is always Yoshon everywhere in the world. This includes Bobbie's fish products sold in Europe.

Kedassia, London. Everything with this hashgocho on it Yoshon everywhere in the world.

London Federation of Synagogues advised that to their knowledge all crackers and biscuits produced in Europe are Yoshon. Obviously not all of these are under the hashgocho of the Federation. All packaged products with the Federation's KF symbol are always Yoshon, whether sold in Israel or elsewhere.

IMPORTANT NOTE: As mentioned above, food produced **in Israel** itself under reliable hashgocho is always Yoshon. However, we have ample evidence that many **packaged goods are being imported to Israel with no concern about the possibility that they may be Chodosh**. Importers often paste their own labels, in Hebrew on such packages, describing the foreign kashrus organization that vouches for the kashrus, but not the Yoshon status, of the contents. The general public in Eretz Yisroel is more strict about Chodosh than the majority of people in Chutz L'Aretz. Nevertheless, this public is often not aware that some of the hashgochos in Chutz L'Aretz are not usually actively avoiding Chodosh. We are warning our brothers and sisters in Eretz Yisroel about this problem and we urge our readers to also spread the word.

15. Elsewhere in the world

This section includes: 15.1 Antwerp; 15.2 Canada; 15.3 England; 15.4 Johannesburg; 15.4 Melbourne;

15.1 Antwerp, Belgium

The locally grown wheat is always Yoshon. The bakeries use local wheat flour for breads and chalahs, making these Yoshon. Some of the bread-like cakes, such as yeast cakes may be Chodosh. For pasta, ask for Israeli products, which are always Yoshon. Barley that is locally grown is Yoshon. However, apparently, during some years, most of the barley used for cholent comes from North America and may be Chodosh. For up to date information, contact Rabbi S. Golovenshitz, 011-323-230-8537. We are not aware of any facilities producing Yoshon under hashgocho in Antwerp.

15.2 Canada

Consumers in Canada should contact the COR directly for copies of these bulletins. All items from wheat and oats made in Canada are Yoshon at least up to a packing date of Sept 22.
