# SHOPPING GUIDE

RECOMMENDATIONS ARE FOR ITEMS PRODUCED IN THE UNITED STATES

## Acceptable without Pesach Certification

Food items in this section should preferably be purchased before Pesach

## Must bear reliable Pesach Certification

## Not acceptable for Pesach

Sephardim should contact their local Sephardic Rabbi regarding issues of *kitniyos*

| PRODUCT            |   | NOTES   |
|--------------------|---|---|
| Adhesive Bandages  | ✓ |   |
| Air Freshener      | ✓ |   |
| Alcohol            | ◇ | For drinking  |
|                    | ✓ | Denatured or Isopropyl alcohol  |
| Alfalfa Sprouts    | × | <i>Kitniyos</i>   |
| Aluminum Products  | ✓ | Includes aluminum foil and pans   |
| Amaranth           | ◇ | Amaranth is not <i>kitniyos</i> but requires Pesach certification to be sure no other grains are mixed in                         |
| Ammonia            | ✓ |   |
| Anise              | × | Same status as <i>kitniyos</i>  |
| Antacid (Chewable) | ◇ |   |
| Apple Juice        | ◇ | Concentrate also requires Pesach certification  |
| Applesauce         | ◇ |   |
| Aspartame          | ◇ |   |
| Baby Carrots, raw  | ✓ | Acceptable if they contain no additives   |
| Baby Carrots       | ◇ | Canned, cooked, or frozen   |
| Baby Food          | ◇ | Includes jarred or canned   |
| Baby Formula       |   | See page 20. When acceptable, bottles should be filled and cleaned separately from Pesach dishes since formula is <i>kitniyos</i> |
| Baby Oil           | ✓ |   |
| Baby Powder        |   | Acceptable if it only contains talc, talcum powder, cornstarch, or other innocuous ingredients                                    |
| Baby Wipes         | ✓ |   |
| Bags               | ✓ | Includes paper & plastic  |
| Baking Powder      | ◇ |   |
| Baking Soda        | ✓ |   |

| PRODUCT                     |   | NOTES  |
|-----------------------------|---|--|
| Balloons                    |   | If powdered, wash before Pesach  |
| Band-Aids                   | ✓ |  |
| Beans                       | × | <i>Kitniyos</i>  |
| Bean Sprouts                | × | <i>Kitniyos</i>  |
| Benefiber                   | × | <i>Chametz</i>   |
| Beverages                   | ◇ |  |
| Bicarbonate Of Soda         | ✓ |  |
| Bird Food                   |   | See page 21  |
| Bleach                      | ✓ |  |
| Bleach Wipes                | ✓ |  |
| Blush                       | ✓ |  |
| Body Wash                   | ✓ |  |
| Braces                      | ✓ | Wax for braces is also acceptable; wash rubber bands before placing in mouth |
| Brewer's Yeast              | × | <i>Chametz</i>   |
| Brown Sugar                 | ◇ |  |
| Buckwheat                   | × | <i>Kitniyos</i>  |
| Buckwheat Pillow            | ✓ | One may own and derive benefit from <i>kitniyos</i>                          |
| Butter                      | ◇ |  |
| Candles                     | ✓ | Scented are also acceptable  |
| Candy                       | ◇ |  |
| Canned Fruits or Vegetables | ◇ |  |
| Canola Oil                  | × | <i>Kitniyos</i>  |
| Caraway                     | × | Same status as <i>kitniyos</i>   |
| Carrots                     |   | Raw (including baby carrots) are acceptable if additive-free                 |
|                             | ◇ | Canned, cooked, or frozen  |
| Cat Food                    |   | See page 21  |
| CBD Oil                     | ◇ |  |

# SHOPPING GUIDE

| PRODUCT  |   | NOTES  |
|--|---|--|
| Charcoal   | ✓ | Includes plain, easy-light, apple, hickory, and mesquite   |
| Cheese   | ◇ |  |
| Cheese Spreads                                   | ◇ |  |

## FAQ Anise – Same Status as *Kitniyos*

**Q** The cRc shopping guide lists a few varieties of anise (caraway, cumin, coriander, dill, and fennel) as “same status as *kitniyos*.” Can you explain what that means?

**A** *Rema* 453:1 rules that anise and coriander are not *kitniyos*. Some of the later *Poskim* (*Taz* 453:1 & 462:3, and *Chok Yaakov* 453:9) basically accept this *psak* but suggest that these spices be checked carefully to make sure none of the five grains are mixed into them. Other *Poskim* (*Magen Avraham* 453:3) take a stricter approach and are of the opinion that one should avoid these spices since it is so difficult to check whether grains are mixed into them. Rav Schwartz *zt”l* accepted the ruling of *Mishnah Berurah* 453:13 to follow the stricter approach. Accordingly, these spices are listed in our shopping guide as “same status as *kitniyos*.”

# CAN IT BE KASHERED?

This is a quick guide to which items can and cannot realistically be *kasher*ed for Pesach. For details on how to *kasher* them, scan the QR code or search [www.ASKcRc.org](http://www.ASKcRc.org) for the specific item. For a listing of countertops which can be *kasher*ed, scan the QR code on the next page.

- A. Can be *kasher*ed if made of metal, plastic, or rubber, but not if made of ceramic, china, glass, or porcelain
- B. Can only be *kasher*ed if surfaces are not scratched
- C. Can only be *kasher*ed if motor area is sealed so no food can get in
- D. Scan QR code or check [www.ASKcRc.org](http://www.ASKcRc.org) for details

# KASHERING THE KITCHEN

## Counters, Sinks, and Tables

One may not *kasher* surfaces made of porcelain, ceramic, cement, or glass, but can *kasher* stainless steel, stone, marble, quartz, plastic/laminate, or wood if there are no cracks, nicks, or scratches where food might be stuck. Some additional materials are listed in the chart on the previous page, and more details are available by scanning the QR code below.

To *kasher* these surfaces, clean them thoroughly, don't use them for 24 hours, boil a kettle of water, and carefully pour that water over all surfaces. Want to use a steamer? Scan the QR code. Some have a custom to cover these surfaces for Pesach even after *kashering* them, and "covering" is the only option if a sink, counter, or table is not suitable for *kashering*. [For sinks, aside from *kashering*, replace the strainer covering the drain and the aerator on the faucet, and if there is a coiled hose, do not pull it out of its base during Pesach.]

## Cups

Most cups cannot be *kashered*, since they are made of glass, china, or ceramic. Metal or plastic cups that are not scratched can be *kashered* like flatware.

## Flatware

Clean them well, don't use them for 24 hours, submerge one piece at a time in boiling water, and then rinse with cold water.

## Microwave Oven

The glass plate cannot be *kashered* and must be removed. To *kasher* chamber, clean thoroughly, do not use for 24 hours, and then place a bowl of water in the chamber and boil it for 10-15 minutes. It is commendable to cover food on Pesach.

## Oven

Either run a full self-clean cycle, or clean thoroughly, do not use for 24 hours, and then set oven to 550°F for one hour. [Low-temperature self-clean cycles (e.g., AquaLift) do not qualify as *kashering*.]

## Refrigerator and Freezer

Clean thoroughly and line with plastic or foil that is perforated to allow for air circulation.

## Stovetop

Clean surfaces and grates well, do not use for 24 hours, and then turn on the flame or coil to its highest setting for 30 minutes. [15 minutes is enough for exposed electric coils.] This is also effective for glass-covered stovetops. After *kashering*, cover the knobs, catch trays, all areas **between** the burners, and any areas **behind** the burners where pots might touch.

Induction stovetops cannot be *kashered*, and pots should be put onto "induction discs" during Pesach.

## Tablecloths

Fabric tablecloths may be used for Pesach after being laundered. Vinyl/plastic tablecloths **cannot** be *kashered*.

## Other

Dishwashers cannot be *kashered* for Pesach. For warming drawers, pots, and other items not listed here, scan the QR codes below.

(773) 465-3900  
www.crcweb.org

Rabbi Sholem Y. Fishbane  
Kashruth Administrator

סוּס תשפ"ה / Pesach 2025

### MEDICINES, COSMETICS & TOILETRIES FOR PESACH

NOTE: THIS LETTER REFERS TO PESACH-SPECIFIC CONCERNS.  
PLEASE CONSULT YOUR RABBI REGARDING THE USE OF MEDICINES, COSMETICS,  
AND TOILETRIES ON *SHABBOS* AND *YOM TOV*.

#### MEDICINES

- All pill or non-chewable tablet medication – with or without *chametz* – that one swallows is permitted. [Candy-coated pills are an exception to this rule, but they are quite uncommon.] Vitamins and food supplements do not necessarily fall into this category, and each person should consult with their Rabbi.
- Liquid and chewable medications that may contain *chametz* should only be used under the direction of a doctor and Rabbi, who will judge the severity of the illness, the likelihood that the medicine contains *chametz*, and the possibility of substituting a swallowable pill.

**Important: Do not discontinue use of liquid, chewable or any other medicine without consulting with your doctor and Rabbi.**

- Liquid and chewable medications that contain *kitnios* may be consumed by someone who is ill. An otherwise healthy person, who would like to consume a liquid or chewable medicine to relieve a minor discomfort, should only do so if the product is known to be free of *kitnios*.

#### COSMETICS & TOILETRIES

- All varieties of blush, body soap, conditioners, creams, eye shadow, eyeliner, foundations, ink, lotions, mascara, nail polish, ointments, paint, shampoo, and stick deodorant are permitted for use on *Pesach* – regardless of the ingredients contained within them.
- Many varieties of cologne, liquid deodorants, hairspray, mousse, perfume, shaving lotion, sunscreen, and wipes contain denatured alcohol, and therefore should only be used on *Pesach* if they do not contain alcohol or the alcohol is known to be free of *chametz*. Such products manufactured in the United States may be used, regardless of whether the ingredient list includes denatured alcohol.
- Lipstick, mouthwash, and toothpaste which contain *chametz* should not be used.

Rabbi Yona Reiss  
Av Beis Din, Chicago Rabbinical Council

Rabbi Shmuel Fuerst  
Dayan, Agudath Israel of Illinois

Rabbi Dovid Zucker  
Rosh Kollel, Chicago Community Kollel

## Medicine Guidelines

The cRc's general guidelines on medicines, cosmetics, and toiletries can be found on the previous page. The following is a summary of the medicine portion of those guidelines:

All pill medication – with or without *chametz* – that one swallows is permitted. (Candy-coated pills are an exception to this rule, but they are quite uncommon.)

Vitamins generally do not qualify as medications and are instead treated as food supplements which require *hashgachah* for Pesach. If a doctor prescribes a specific vitamin which does not have Pesach supervision, please review your specific situation with your doctor and Rabbi.

Liquid and chewable medications that may contain *chametz* should only be used under the direction of a doctor and Rabbi, who will judge the severity of the illness, the likelihood that the medicine contains *chametz*, and the possibility of substituting a swallowable pill. **Important: Do not discontinue use of liquid, chewable, or any other medicine without consulting with your doctor and Rabbi.**

Liquid and chewable medications that contain *kitniyos* may be consumed by someone who is ill.

For laws of taking medicine on Shabbos and Yom Tov, please consult your Rabbi.

## Medicine and Toiletry Details

Items marked "Possible *Chametz*" contain edible ingredients whose *chametz* status we were unable to determine; these items may be permitted for someone who is seriously ill, and consumers should consult with their Rabbi.

For an expanded and updated list of products, search [www.ASKcRc.org](http://www.ASKcRc.org) or the cRc apps.

## Allergy

**At Home Health Children's Allergy (Cherry Flavor) (Liquid)** Possible *Chametz*

**Benadryl Children's Allergy (Grape Flavor) (Chewable Tablets)** Possible *Chametz*

Possible *Chametz*

**Pepto Bismol Kids Pepto Bubble Gum Flavor (Chewable Tablets)** Possible *Chametz*

**Pepto Bismol Ultra (Liquid)** Possible *Chametz*

**Probiotics Assorted (Assorted)** Powders, liquids, capsules, & gelpcaps need certification; pills do not

**Up & Up 5-Symptom Digestion Relief (Chewable tablets)** Possible *Chametz*

**Antibiotics**

The cRc recommends all medicinal items in pill form, which includes most of the antibiotics that adults take. The same does not apply when dealing with liquid or chewable medicines, which are considered "edible." Since there is a chance that they contain *chametz*, they should only be used if they are known to be free of any concerns.

However, antibiotics are an exception to that rule. Generally, antibiotics are given to treat ailments which, if left untreated, can lead to a situation of *sakanah* (danger to life). Therefore, one may consume antibiotics, regardless of the ingredients used in creating them.

**Blush**

All are recommended

**Body Soap**

All are recommended

**Cologne**

Only recommended if free of (denatured) alcohol or if manufactured in the United States

**Cough, Cold, & Flu**

**Alka Seltzer Plus Cold Effervescent Tabs (includes Night Cold Formula) (Tablets)** Possible *Chametz*

[www.crc kosher.org/consumer](http://www.crc kosher.org/consumer)

## Fiber Supplements

See *Laxatives*

## Fever Reducer / Pain Relief

### Fever for A Child

Each year, the cRc researches different fever reducers and pain relievers to see which are suitable for use for Pesach. Some of the results are ready in time for inclusion in the printed cRc Pesach Guide, and others can only be found in the cRc app or at [www.ASKcRc.org](http://www.ASKcRc.org).

## FAQ Coated Pills

**Q** It says on your website that one can take any pill medication that is swallowed. Does that include coated pills such as Advil?

**A** Most pills which are meant to be swallowed are coated with a glaze, wax, or shellac, which makes the pills easier to swallow, and some of these coatings have some form of simple sugar (e.g., sucrose). None of these ingredients are problematic for Pesach.

In rare cases, though, a pill has a flavor or is coated with sweeteners which are Pesach-sensitive (e.g., sorbitol or mannitol). These are listed as inactive ingredients, and we don't recommend them for Pesach. One example of this are some Advil brand products. The inactive ingredient panel occasionally lists that the coating contains mannitol or a flavor, and those items are not recommended.

# FRUIT & VEGETABLE BUG CHECKING GUIDE

## A Sampling

Below you will find the current cRc position on a few popular items. Infestation levels change due to numerous factors, including seasons, growing environments, and global imports; therefore, the cRc constantly reviews its policies and cleaning methodologies. The instructions noted below represent the most updated information as of the printing of this guide. For current information, please search at [www.ASKcRc.org](http://www.ASKcRc.org). For instructions on the thrip-cloth method, see next page.

### Asparagus

**FRESH GREEN ASPARAGUS** must have the tips cut off and discarded. One should either peel the entire sides of the asparagus or remove all the triangular side leaves and wash well. **CANNED** are permissible only with a reliable kosher certification. **FROZEN** are only permissible with reliable kosher certification or if one follows the steps above. **FRESH WHITE ASPARAGUS** can be used after simply rinsing it well.

### Bell peppers

All **BELL PEPPERS** must have the crown/stem area removed and the rest of the outside of the pepper be rinsed and rubbed (especially in the grooves) under running water. This is true for **MINI PEPPERS** as well. They may not be roasted whole. The crown/stem area must be chopped off, and then washed and rubbed very well.

### Blueberries, fresh

Agitate the **BLUEBERRIES** in soapy water for a minute, and then agitate one more time in plain water. This does not apply to **ORGANIC** and **U-PICK BLUEBERRIES** which require the thrip-cloth method.

### Celery stalks

**NON-ORGANIC** – cut away and discard the leaves, then wash each stalk under a stream of water.

**ORGANIC** – cut away and discard the leaves, place the stalks in a bowl of soapy water, and then wash each stalk under a stream of water.

### Endives, Belgian, fresh

Separate the leaves and wash each one individually under a stream of water.

### Endives, fresh

Use cRc thrip-cloth method.

### Fennel, fresh

**FENNEL FRONDS** — Use cRc thrip-cloth method.

**FENNEL STALKS** — Wash each stalk under a stream of water.

**FENNEL BULB** — Either check carefully between each layer or wash each layer off individually.

### Garlic, fresh

Peel and rinse. Cloves need to be separated.

### Grapes

Separate the large bunch of grapes into 3 or 4 smaller bunches and rinse under cold water.

### Leeks

Cut along full length of the leek so every leaf is separated. Wash each leaf thoroughly under running water.

### Lettuce, Romaine, fresh

Use cRc thrip-cloth method.

For **ROMAINE NON-ORGANIC HEARTS**, the following alternative method may be utilized:

1. Separate the leaves from the hearts, place them in a bowl of soapy water, and agitate for approximately one minute.
2. Remove lettuce from the soapy water and gently rub all areas of both sides of the leaves with a sponge (this includes flattening the curled up edges so that they can be scrubbed).
3. Rinse each leaf under running water, front and back, while running your fingers across the entire leaf to undo the folds.
4. Start again by putting the lettuce back into a fresh bowl of soapy water and agitate the leaves for about a minute.
5. Rinse each leaf under running water, front and back.

If this alternative method is not convenient, use cRc thrip-cloth method.

## FAQ Vegetable Wash

**Q** Does vegetable wash require *hashgachah* for Pesach?

**A** Yes, it does. Although there are a few kosher vegetable washes on the market, to the best of our knowledge, none of them are certified for Pesach. You can substitute a small amount of dish liquid (any is acceptable) which will do the same job, if not better.

The cRc is proud to maintain a full database of common fruits and vegetables purchased in the United States and their respective proper checking methods. The full range of fruits and vegetables can be found by searching [consumer.crckosher.org/consumer/fruitsvegetables](http://consumer.crckosher.org/consumer/fruitsvegetables).

### Mushrooms, fresh

**STANDARD (BUTTON) FRESH MUSHROOMS** can be used after they are washed well. For **PORTOBELLO MUSHROOMS**, make sure the washing includes the fan area. For **SHITAKE MUSHROOMS**, wash each one individually under a strong stream of water. **OYSTER, PORCINI, and MOREL MUSHROOMS** are not recommended.

### Parsley and other herbs, fresh

Use cRc thrip-cloth method.

### Scallions (green onions), raw

Check for leaf miners on the tubes/stems. If a leaf miner trail is found, then remove the entire trail.

Dice the entire scallion into small pieces. Place into a bowl of water with a little bit of soap, and agitate for approximately 30 seconds. Pour into a strainer and rinse.

Alternatively, slice the entire scallion across its length, and check carefully for insects.

### Strawberries, fresh

1. Cut or pluck off green tops.
2. Place strawberries into a bowl of soapy water and strongly swish them around for about a minute. Water should be approximately the ratio of 8 cups of water to 1 tablespoon of (a non-fragranced) soap.
3. Remove soapy strawberries and place them into a bowl of plain water. Swish around for about 30 seconds to a minute.
4. Remove strawberries and place them into a new bowl of soapy water (see above for amount of soap) and swish them around again for about 30 seconds to a minute.
5. Rinse and enjoy.

Please note that this does not apply to organic strawberries that are very difficult to get cleaned and therefore should be avoided at this time. Of course, if one wants to avoid the above steps, one can eat the strawberries (even organic) by simply cutting off the tops and peeling off the entire outside of the strawberries, followed by a rinse.

# THRIP-CLOTH METHOD

## Supplies

You will need a thrip cloth, light box, large bowl, dish soap, and 2 strainers.

“Thrip cloths” are fine silk cloths which filter insects from water; they are available for purchase from the cRc. Seventh Generation Free and Clear dish soap is a good choice for this procedure. cRc does not recommend the use of salt water or vinegar to properly remove insects from fruits and vegetables.

Scan here to purchase thrip cloths.

## Procedure

1. Separate the leaves and place them into a bowl of water.
2. Put enough dish soap or kosher vegetable wash into the bowl until the water and leaves feel somewhat slippery.
3. Soak and agitate the leaves in the soapy water for 1-2 minutes.
4. Remove the leaves from the bowl and discard the water.
5. Repeat Steps 2-4. Alternatively, put the leaves in a bowl of water to soak, and wash both sides of each leaf under running water.
6. Place leaves into a bowl of fresh soapy water and agitate for 1-2 minutes.
7. Remove leaves and pour the soapy water through a thrip cloth which is sandwiched between 2 strainers.
8. Check the cloth carefully on top of a light box. If no insects are found, rinse and enjoy. If an insect is found, repeat Steps 6-8. If insects are found after performing these procedures 3 times, the produce is overly infested and should be discarded.

Watch Rabbi Yisroel Langer demonstrating the thrip-cloth method.

# MILK SUBSTITUTES, NUTRITIONAL SUPPLEMENTS, AND INFANT FORMULAS

The OU has researched the following milk substitutes, nutritional supplements, and infant formulas, and has determined that they are respectively suitable for someone who is infirm (*choleh she'ain bo sakanah*) and for infants, when bearing the OU logo.

Most of these products contain *kitniyos*, and for some that is the primary ingredient. Accordingly, consumers should consult with their Rabbi before deciding to use these items which are not fully kosher for Pesach. With the exception of the flavors used, any item which might be *chametz*-based is used in such small proportions that it is *batel b'shishim* (nullified). Where possible, it is preferred to (a) use a substitute which is certified for Pesach, and (b) use a liquid supplement instead of a powdered one. Products should be purchased before Pesach and be maintained segregated from Kosher for Pesach foods.

## Milk Substitutes

• Blue Diamond Almond Breeze Original Unsweetened Almond Milk (pareve) • Califia Farms Go Coconuts Coconut Milk • Westsoy West Life Plain Soy Milk

## Medical Nutritional Supplements

• Abound • Arginaid • Arginaid Extra • Benecalorie • Beneprotein • Boost Glucose Control • Boost High Protein • Boost Nutritional Pudding • Boost Plus • Calcilo XD • Cyclinex • Diabetishield • Diabetisource AC • Elecare • Enlive • Ensure (all shakes, all liquids, all powders, all flavors, excluding bars) • Fibersource HN • Glucerna (all shakes, all powders, all flavors, excluding bars) • Hi-Cal • Hominex • Isosource • Isosource HN with Fiber • I-Valex • Jevity (all liquids, all powders) • Juven • Ketonex • Nepro (all shakes, all powders, all flavors) • Novasource Renal Nutren (Product line) • Nutren (unflavored) • Osmolite (all) • Perative • Phenex • Portagen • Promote (except Promote with Fiber) • Propimex • Provimin • Pulmocare (all flavors) • RCF • Resource 2.0 • Resource Dairy Thick • Resource Diabetic • Resource Milk Shake Mix • Resource Thicken Up • Resource Thickened Juice • Resource Shake Plus Simply Thick • Suplena with Carbsteady • Thick & Easy (all) • Thick-It • Twocal HN • Tyrex • Vital Peptide • Vivonex Pediatric • Vivonex Plus • Vivonex Ten

## Pediatric Supplements

## Baby Food

First Choice Baby Food: Applesauce, Carrots, Pears, and Sweet Potatoes are approved when bearing an OU-P or OU Kosher for Passover symbol.

# PESACH PET FOOD

On Pesach, a Jew may not eat, own, or derive benefit from *chametz*, but he may own or have benefit from *kitniyos*. Accordingly, in addition to year-round concerns about meat and milk ingredients in the same product, pet food must be free of *chametz* if one will own or use it on Pesach. The following are pointers to help you read the pet food's ingredient panel to determine if there is any *chametz* present.

1. In addition to checking for the five *chametz* grains – wheat, barley, rye, oats, and spelt – also look for brewer's yeast, malt, pasta, xanthan gum, and other generic terms which may refer to a *chametz* ingredient (e.g., flour, gluten, middlings, starch, et al.). If any of these are present, you should not own or use this pet food on Pesach.
2. Many varieties of pet food contain a multitude of vitamins and minerals. Although there is a chance some might be *chametz*, they typically comprise such a small percentage of the food that they are *batel*, and do not pose a concern.
3. Some common ingredients which do not pose a Pesach concern are:
  - A. **Animal, poultry, and fish** products.
  - B. **Vegetables**, such as alfalfa, asparagus, beets, and carrots.
  - C. **Assorted *kitniyos* foods**, such as buckwheat, corn products, lentils, millet, peas, rice, peanuts, sunflower seeds, and soy products.
  - D. **Other items**, such as barley grass, BHA, BHT, carrageenan, cellulose, colors, eggs, gums (other than xanthan gum), kelp, lactose, linseed, milk products, molasses, oils, psyllium, and whey.

If you are unsure about any ingredients in a pet food, you might want to contact a *kashrus* professional for guidance.

## The following are recommendations for specific pets

To determine which of these are appropriate for your specific type of pet, please see additional guidance on our website, or check with your vet.

**Cats and Dogs** cRc Kosher approves many varieties of Evanger's brand as being free of *chametz* (and *basar b'chalay*). See the cRc website for details.

**Fish** tubular worms, frozen brine shrimp, and freeze-dried worms (if they do not contain fillers)

**Birds** millet, canary grass seed, rapeseed, alfalfa pellets (pure), safflower seeds, and sunflower seeds. Supplement with sliced grapes, berries, and canned baby fruit. For minerals, use oyster shells or mineral blocks.

**Small Mammals** millet, sunflower seeds, safflower seeds, timothy hay, potatoes, and small amounts of greens and vegetables. Supplement with grapes, apples, melons, and oranges.

Be aware that **mealworms**, which, as living creatures are not *chametz*, are commonly sold in a bed of wheat flakes or oatmeal, which is *chametz*. Whole insects (live or dead) with no additives or other ingredients are permissible.

# PESACH FAQs

## SHOPPING GUIDE FAQs

### Buy Before Pesach

**Q** I see that you recommend certain items for Pesach but say they should be bought before Yom Tov. If they do not contain any *chametz*, why can't I also buy them on Chol HaMoed?

**A** There are a handful of items – milk, eggs (in the shell), bagged salads, baby carrots – where (a) additives are used which might be *chametz* (though they probably aren't), (b) the additives are *batei b'shishim*, but (c) they're in stores very soon after they're processed. So, the milk, eggs, etc., which you buy on Chol HaMoed might have been produced on Pesach with a *chametz* additive which can't be *batei* (since it was added on Pesach). This is why we recommend that if these items aren't available with Pesach certification, you should buy them before Yom Tov.

### Contact Lens Solution

**Q** Do I need special contact lens solution for Pesach?

**A** We reviewed the ingredients used in several popular brands of contact lens solution and didn't see anything which was sensitive for Pesach. But since we haven't checked every brand, you're welcome to send a picture of the ingredient panel to [info@crckosher.org](mailto:info@crckosher.org), and one of our Rabbis will check on it for you.

### Alcohol

**Q** I know that alcohol can be made from wheat. What about things like isopropyl alcohol?

**A** Benzyl alcohol, methyl alcohol (a.k.a., methanol), isopropyl alcohol and stearyl alcohol aren't made from *chametz*. Ethyl alcohol, a.k.a. ethanol, can be made from *chametz*, and isoamyl alcohol is often a byproduct of whisky. [These might be listed as part of a compound, like ethyl acetate or isoamyl butyrate.] So, they're not recommended unless they are known to be *chametz*-free.

There are different opinions about whether denatured alcohol (SD alcohol) is forbidden on Pesach. The cRc position is that it's fine in a product manufactured in the U.S.

### Seltzer

**Q** Why does the cRc require a Pesach *hechsher* on unflavored seltzer?

**A** There are several ways to collect the carbon dioxide that's used to make seltzer. One source is a byproduct of beer or whisky production, and of course, beer and (just about all) whisky are *chametz*. There's a difference of Rabbinic opinion about whether the *chametz* status transfers to the carbon dioxide gas. Some say that since carbon dioxide is a gas, and it's "scrubbed" of all *chametz* taste, it's permitted on Pesach, despite the *chametz* source. The cRc follows the stricter opinion that treats the gas as *chametz*, since it's a direct result of the beer or whisky production. If you get seltzer with a reliable Pesach *hechsher*, you can be sure that it's not coming from a *chametz* source.

### Disposable Gloves

**Q** Is there anything wrong with using disposable gloves on Pesach?

**A** Disposable gloves aren't inherently problematic for Pesach, but some are coated with powder to prevent the gloves from sticking. The powder is likely made from *kitniyos* or an innocuous material, but it's possible that it will be *chametz*. For example, a company recently began marketing disposable gloves which are dusted with colloidal oatmeal to help hydrate the skin inside the glove. Accordingly, we recommend that people only use powder-free gloves or ones that are known to not have *chametz* issues.

### Bottled Water

**Q** Is bottled water acceptable for Pesach without special certification?

**A** Yes, and this is true even if the water also has these minerals: calcium chloride, magnesium chloride, magnesium oxide, magnesium sulfate, potassium bicarbonate, potassium chloride, sodium bicarbonate, or sodium chloride. But if it has any flavors, vitamins, and/or citrates (e.g., calcium citrate), then it should only be used with kosher for Pesach certification.

## Toothpaste

**Q** Is it okay to use my regular toothpaste on Pesach?

**A** Some *Poskim* hold that toothpaste is considered inedible, since any food that tastes like toothpaste would never be served as a meal item. This is why many Rabbis allow the use of any toothpaste (year-round), despite the possibility that the glycerin in the toothpaste is made from non-kosher animal fat. Others argue that toothpaste is *halachically* considered edible, since we put toothpaste in our mouths every day (and young children like to eat it). Some follow that position all year-round and will only use a toothpaste that is certified as kosher (or free of glycerin).

The cRc accepts the lenient approach as relates to year-round use but recommends that one be *machmir* for Pesach – that you should only use a toothpaste that’s known to be *chametz*-free.

What ingredients in toothpaste might be *chametz*? Just about every variety of toothpaste has sorbitol, which is created by “hydrogenating” glucose, which can be derived from *chametz*, *kitniyos*, or completely innocuous ingredients, and, though most glucose and sorbitol in the U.S. is not made from *chametz*, we can’t recommend toothpaste unless we know what the glucose is made from. Toothpastes also commonly contain other minor ingredients which raise *chametz* concerns.

# KASHERING THE KITCHEN FAQs

## Braces

**Q** How should I clean out my braces after eating *chametz* for the last time before Pesach?

**A** We have been told by orthodontists that [for those people who do not have a water-flosser (e.g., Waterpik)] the best way to clean braces is to use a “proxal brush” which has a narrow-bristled end that fits between the different wires and brackets. It is an inexpensive and effective tool for removing all residue from braces and other dental appliances.

## Steamers

**Q** Can I *kasher* my countertops with a steamer?

**A** The general rule (as per *Iggeros Moshe* YD 1:60) is that *kashering* must be done with water in liquid form, and can’t be done with steam. So, a steamer can only be used for *kashering* if two conditions are met. First, the steam must condense to the point that the whole area being *kashered* is covered with water, and second, that water must be at approximately the boiling point (212°F). Most steamers sold for cleaning purposes do not meet these criteria and can’t be used for *kashering*, but Wagner Power Steamer 715 can be used, if one is diligent to use it slowly and with patience.

## Faucet With Spray Hose

**Q** The faucet in my new kitchen has a spray hose. Is the *kashering* of that faucet any different than a regular one?

**A** The first step in *kashering* any item is to remove all residual *chametz*. With this in mind, *Rema* 451:18 rules that any utensil which has small cracks and crevices where food might get caught should not be *kashered* for Pesach because of the difficulty in getting the utensil perfectly clean. This poses a concern for many pull-out faucets because the hose is made of a ribbed material where bits of food can get trapped and then fall out into the Pesach food. Accordingly, any faucet with this type of hose cannot be *kashered* for Pesach.

The good news is that the only concern is if the faucet is pulled out, thereby exposing the ribbed portion of the hose. Therefore, one may use the faucet on Pesach if (a) the hose is not pulled out, and (b) the rest of the faucet is *kashered* in the typical manner as described in our Pesach Guide and website.

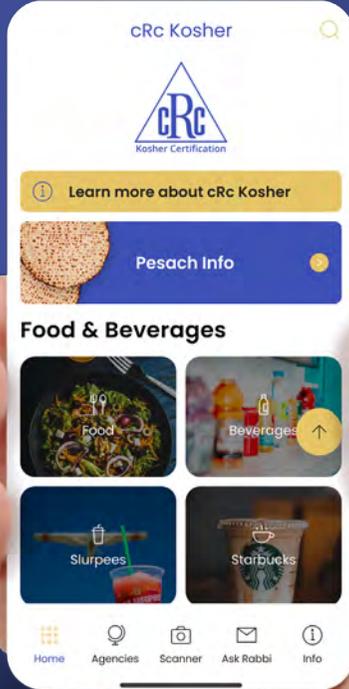

## Iron for Kashering

**Q** My son suggested we *kasher* our countertops by running a hot iron over them. Would this work?

**A** A counter can’t be *kashered* with a clothing iron without any water present. Theoretically, hot water could be poured on the counter, and then the iron could be used to bring that water to a boil, but because it would be too difficult to know whether every single part of the countertop came into contact with boiling water, we wouldn’t recommend it.

# Kashrus at Your Fingertips.
